

DBH Team

DBH= Diameter at breast height

Materials needed:

- "Ben Meadows" Measuring Tape
- DBH Stick
- Clipboard with data sheet

Jobs/Responsibilities:

Stick Holder: *Holds the stick up to the tree*

Measurer: *Measures the tree where the stick hits it*

Recorder: *Records the data neatly and accurately (use the # on the tree)*

Tips:

- ★ All trees **MUST** be measured at the same height!

Tree Identification Team

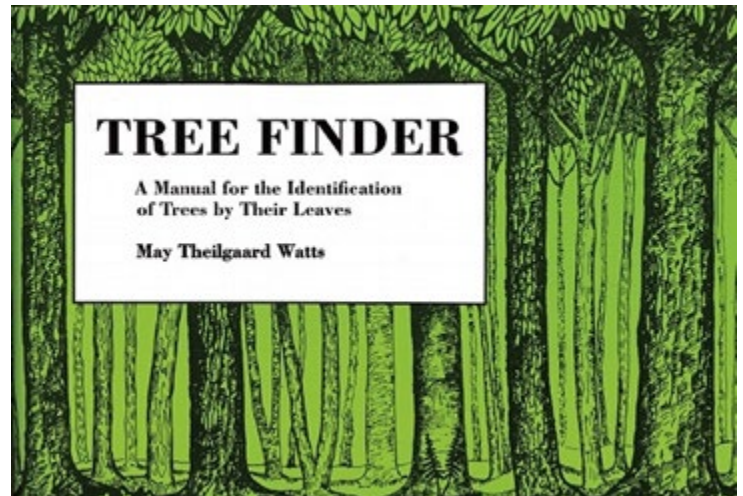

This team should feel comfortable using the tree identification books.

Materials needed:

- Tree identification books
- Clipboard with data sheet

Tips:

- ★ Only identify trees with tags on them.
- ★ Note whether they are living or dead on the data sheet.

Field Description Site Team

This team should be comfortable with identifying invasive species.

Vocabulary:

-Canopy: The upper layer of trees formed by the "crown," or top of the tree.

Materials needed:

- Field Site Description Sheet w/clipboard
- Invasive species binder/guide

Tips:

- ★ Walk around the whole plot so that you become familiar with the plants, dead trees, and rocks in the plot.
